

Dr. H.L. Greenberg

11 years after starting Las Vegas Dermatology, Dr. H.L. Greenberg is finally beginning to understand the ins and outs of having a successful dermatology practice. After nearly going bankrupt while taking his practice from dream to reality, Las Vegas Dermatology has grown from a rented room in an ENT's office into a 5,000 square foot state of the art facility in the Summerlin Hospital Medical Center.

The laser offerings at Las Vegas Dermatology include: Laser Hair Removal, CO₂ Laser treatments (laser wrinkle removal), Laser Tattoo Removal, and Laser Vein Removal. The facilities also contain a lab for MOHS micrographic surgery and a spa area for all kinds of skin treatments from microneedling (Dermapen-for fine scars and wrinkles), chemical peels, facials and microdermabrasion to PRP for hair growth and microneedling.

Dr. Greenberg loves the field of dermatology and has been integrating social media into what he does throughout the course of his practice- he enjoys making dermatology videos- his /lvderm YouTube channel has over 1 million views and he blogs monthly under the pseudonym, "Dr. Vegas".

In his spare time, Dr. Greenberg travels, makes music on garage band, and runs half marathons. The goal of his practice is to assist patients and staff in their quest "For a Healthier and More Beautiful Life."
