

Dr Tatjana Pavicic is a board certified dermatologist specializing in cosmetic surgery and aesthetic treatments with her own private practice in Munich.

She sets her specific focus on a holistic individual approach for face & body combining botulinum toxin, fillers and energy-based devices like lasers, radiofrequency technologies and micro-focused ultrasound.

She is an internationally respected speaker and trainer on advanced cosmetic dermatology and surgery. Dr. Pavicic is member of various national and international dermatologic and cosmetic societies. She is a Treasurer of the Dermatologic Aesthetic Surgery International League (DASIL), General Secretary of the International Peeling Society, Board member of IMCAS Academy, past president of the Dermocosmetic group in the Society of Dermopharmacy, past Board member of International Society of Dermatologic Surgery, and a Global Faculty member of the Merz Institute of Advanced Aesthetics.

After studying medicine at the Ludwig Maximilian University in Munich she started her dermatologic career at the "Klinik und Poliklinik für Dermatologie und Allergologie der LMU" in 2004 receiving her board certification in 2008. From 2007 till 2014 she was Head of the department for aesthetic and laser dermatology.

Dr. Pavicic has extensively published in international journals both in the dermatological and the aesthetic fields since 2001. One of her main areas of research are filler complications and combination treatments. She has been involved in multiple studies with different molecules and compounds (botulinum toxin, dermal filler, native hyaluronic acid, dermocosmetics, lasers, peels, etc.). Additionally, Dr Pavicic followed a training in medical management and marketing at Shangai and WHU in Vallendar.
