

Mario Goisis, MD

Mario Goisis is the director of Doctor's Equipe, a group of 9 clinics and medical offices in Italy. He obtained his MD at Milan University in 1999. He is Certified in Maxillofacial Surgery since 2004.

Dr. Goisis is often called upon by National and International medical and scientific groups to inform and teach doctors on the recent advances in medical and aesthetic cosmetic correction.

As an invited speaker, he has lectured extensively in Europe, Asia and America. In recent years Dr. Goisis has organised more than 120 courses about regenerative medicine, aesthetic mini-invasive procedures and clinical anatomy.

He has patented many instruments for aesthetic, reconstructive and regenerative treatments.

He has written scientific articles about aesthetic medicine and surgery for American and European journals.

He is the editor of the Atlas of Aesthetic Treatments published by Springer, an Atlas with a step-by-step description of full-face treatment and body remodeling with fillers. This atlas is edited in many languages, included Corean and Chinese.

He is the Author of the book Five Layers simple anatomy.

Regarding aesthetic and regenerative medicine techniques, he has more than 15 years of experience.
