

Dr. H.L. Greenberg

13 years after starting Las Vegas Dermatology, Dr. H.L. Greenberg has grown Las Vegas Dermatology from a rented room in an ENT's office into a 5,000 square foot state of the art facility in the Summerlin Hospital Medical Center. The laser offerings at Las Vegas Dermatology include: Laser Hair Removal, CO₂ Laser treatments (laser wrinkle removal), Laser Tattoo Removal, and Laser Vein Removal. The facilities contain a lab for MOHS micrographic surgery and a spa area for all kinds of skin treatments from microneedling (SkinPen-for fine scars and wrinkles), chemical peels, facials and microdermabrasion to PRP for hair growth and the Venus Viva Radiofrequency device for wrinkle reduction. Dr. Greenberg loves the field of dermatology and has been integrating social media into what he does throughout the course of his practice with new formats like TikTok and old favorites-Instagram and Facebook. Dr. Greenberg enjoys making dermatology videos- his /lvderm YouTube channel has over 5,000 subscribers, 1 million views and he blogs monthly under the pseudonym, "Dr. Vegas". In his spare time, Dr. Greenberg travels, makes music on garage band, and runs half marathons. The goal of Las Vegas Dermatology is to assist patients and staff in their quest "For a Healthier and More Beautiful Life."
