

Anastasia Georgievskaya is the co-founder and CEO of Haut.AI, IT company developing AI-powered SaaS for skincare and skin health applications. The big goal of Haut.AI is to use imaging data to help people achieve best skin look and age healthy and allow non-specialist in AI to introduce it to daily operations.

Anastasia has 4 years' experience of integrating AI and computer vision algorithms into consumer companies' technology stack. She has a master's degree in bioengineering and biophysics.

Part of her current research includes search of new non-invasive imaging ageing biomarkers. Her areas of special interest are multi-faceted mechanisms of the aging process, and its impact on psychology.
