## Ignacio H. Medrano

### *Founder & Chief Medical Officer*

Neurologist at Ramón y Cajal Hospital for 10 years, Ignacio's CV includes several masters in health management, as well as being part of the Strategic Management Department of Ramón y Cajal Institute of Health Research.

After graduating from Singularity University (Silicon Valley) in 2014, he founded two artificial intelligence in healthcare companies: Savana (electronic medical record processing), and Mendelian (diagnosis and treatment of rare diseases).

In 2016 Ignacio was considered by the specialized medical media among the most influential people in health for his work promoting systemic changes in the sector through IT and big data. Moreover, in 2018 he was appointed "*digital personality of the year*" in Healthcare. He was awarded the Princess of Girona Foundation Award Company 2019 for "*democratizing access to medical scientific information of millions of patients through artificial intelligence*".
