The **ESCAD TEACHING COURSE** is a course for those who want to hear from experts how to improve their injectables technique. The morning session will explain the theoretical background of filler injection techniques, the afternoon will be filled with three live injection stations where three different experts will demonstrate their techniques in rotational classes. So each delegate will see all three different experts doing live injections. Because of small group size, intensive interaction with the experts is guaranteed.

Thursday JUNE 13, 2024 | 09.00 - 17.00

/// MASTERCLASS ON INJECTABLE FILLERS
