

Ayman Grada, MD, MS

Dr. Grada is a US-trained dermatologist and a physician-scientist with over 17 years combined clinical practice, academic research, and biotech experience. He currently serves as an adjunct professor of dermatology at Case Western Reserve University School of Medicine. Dr. Grada finished his dermatology training and a fellowship in cutaneous wound healing at the Boston University School of Medicine and Boston Medical Center in Boston, Massachusetts. He has over 150 publications on medical dermatology topics including wound healing and inflammatory skin conditions. Dr. Grada is a recognized expert in clinical drug development. He has been involved in topical and oral drug development for acne, atopic dermatitis, and actinic keratosis, and is passionate about education, advancing science in dermatology and improving patient outcomes. Dr. Grada is an Associate Editor for the Journal of Investigative Dermatology (JID) and Physician Editor at VisualDx. He is an active physician member of the American Academy of Dermatology (AAD), European Academy of Dermatology and Venereology (EADV), Society for Investigative Dermatology (SID), International Society of Dermatology (ISD), and the Wound Healing Society (WHS). Dr. Grada also serves on the Board of Directors for the Biology of Skin Foundation (BSF).
