

Dr. Anthony Rossi board-certified dermatologist and micrographic surgeon. He attended New York University undergraduate, majoring in Biochemistry. He then attended Weill Cornell Medical College, where he was president of his class. He went on to complete dermatology residency at St. Luke's Roosevelt – Beth Israel hospitals in New York where he trained under Dr Vince DeLeo, an expert in photobiology. He completed fellowship training in cutaneous oncology at Memorial Sloan Kettering Cancer Center and Weill Cornell Medical College. He currently works as a dermatologic surgeon at Memorial Sloan Kettering and is an assistant professor of dermatology at Weill Cornell Medical College.

Dr. Rossi's research interests include non-invasive imaging of the skin, surgical dermatology, lasers and light-based devices, as well as aesthetic restoration of the skin. While working at Memorial Sloan Kettering Cancer Center he has helped pioneer Restorative Oncodermatology which aims to help cancer patients and survivors manage the sequelae of treatment related effects of the skin. He currently has a clinical trial utilizing platelet rich plasma to treat endocrine-induced and chemotherapy induced alopecias in breast cancer patients. He has published over 100 peer reviewed scientific papers and book chapters, and is currently an assistant editor of the Journal of the American Academy of Dermatology, Dermatologic Surgery Journal, and Lasers in Surgery and Medicine Journal.

He is active in multiple dermatologic organizations, including the American Society for Dermatologic Surgery (ASDS) where he currently serves as a board member and Secretary of the organization. He also is active in the American Academy of Dermatology (AAD), American Society of Lasers in Surgery and Medicine (ASLMS), as well as the American College of Mohs Surgeons (ACMS). He is also founder and creator of Dr. Rossi Derm MD Skincare, a complete peptide based regime that targets skin sensitivity and aging.

He has worked internationally in Ghana, Botswana, Tanzania, and Kenya and continues teledermatology connections. He enjoys traveling, playing tennis, exercising, and Italian film.
