

Dr Steven Land

Dr Steven Land MBBS MRCEM is an aesthetic doctor with 11 years experience of creating award winning, natural results at his clinic - novellus aesthetics - in Newcastle, England. His clinical foci are lip fillers; full face treatments and non-surgical rhinoplasties.

His background in emergency medicine has seen him develop an interest in complication management and ultrasound, whilst his unique 1:1 training and bespoke mentoring days are helping to develop the next generation of aesthetic practitioners. After starting a support group for practitioners across the north east and beyond, - which now boasts 750 members - he has started the North East Aesthetics Forum, a regular in person training and networking event.

His next focus is bringing true anti-ageing medicine to the aesthetics space as brand ambassador for Nuchido, faculty for Mastelli and continuing to spread the word speaking at national and international conferences.

He continues to fight for proper regulation in aesthetic medicine.
